

BirdGard - BOX

Acoustical bird control for **Crows** and **Seagulls**

Natural bird control with bird distressed calls that are played on demand via handheld radio for a successful and long lasting bird control!

- Very effective against crows, seagulls, starlings and more
- Low maintenance
- Several settings
- Easy to use
- Random and radio operated*
(*radio optional)
- High quality
- Solar optional

By playing different bird distressed calls sounds from that species present at the area, the birds will be aware of the hazard and will avoid the area. The distressed calls are only effective against the bird species which will understand the calls. For a human the sounds are like normal bird calls and are not dangerous.
